IBMV MAHAVIDYALAYA | PROPOSAL | OCTOBER 2026

One platform for every IBMV student, course and payment

A new website, student portal and admin panel that work together. Students learn, pay, take exams and receive certificates in one place. Your team runs everything from one panel, without a developer.

At a glance

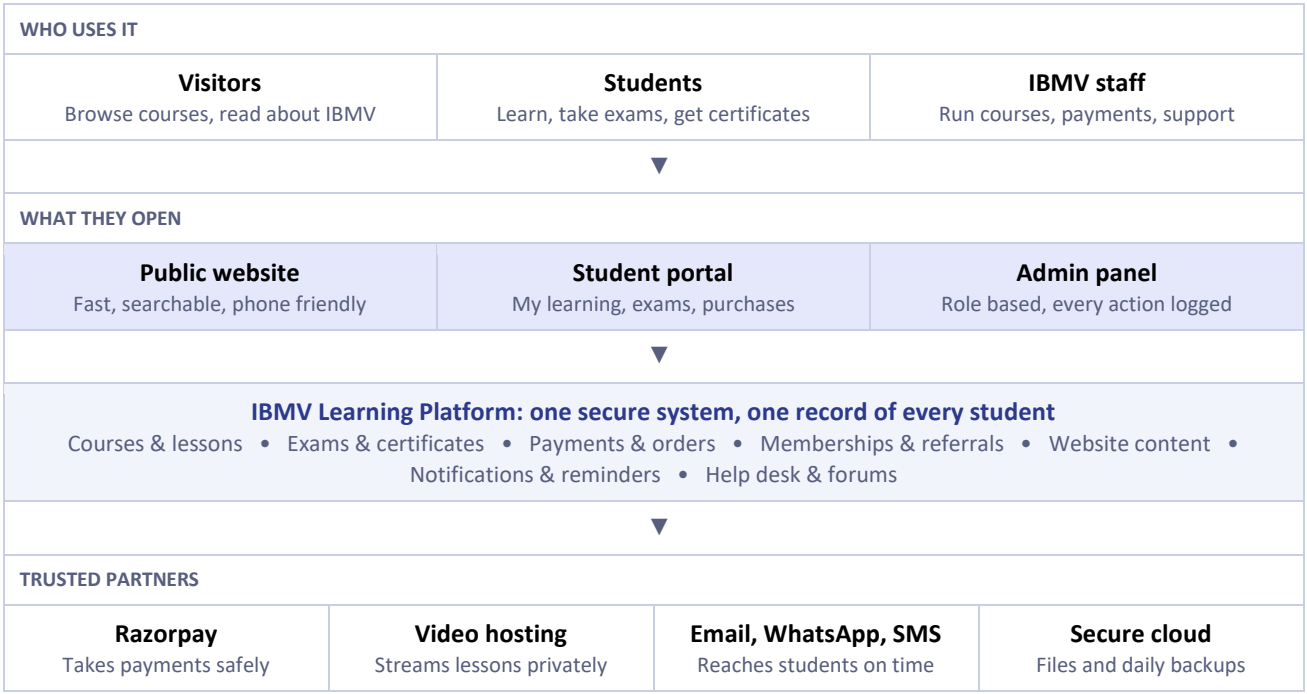

Item	Summary
Apps delivered	Public website, student portal, admin panel, with Razorpay payments and messaging built in.
Delivery	Ten stages. After each stage you see a working demo on a private test site.
Time to launch	About 24 weeks of work. We advise planning for 28 weeks (about 6.5 months) to allow for feedback rounds and partner approvals.
Testing	Included in every stage, plus a final security test, load test and staff acceptance testing before launch.

What your students and team get

- **A faster public website.** Banners, courses, teachers, publications, magazine subscription and contact pages. Search and filter by category, language and learning mode. Built to rank well on Google and to open quickly on phones.
- **A student portal.** Sign up and verify, then learn: videos, PDFs, progress with resume, discussions, announcements, a calendar in the student's own timezone, and live class links for enrolled students.
- **Exams and certificates.** Timed multiple-choice exams with automatic marking and limited attempts. Passing students download a certificate with a verification number anyone can check.
- **Payments you can trust.** Course and membership payments through Razorpay. A student who pays gets access automatically and receives a receipt. Refunds are tracked.
- **Memberships and Refer & Earn.** Plans with benefits and validity, renewal reminders, referral links and credits. If a referred order is refunded, the reward is reversed.
- **Reminders that reach students.** Email, WhatsApp, SMS and browser notifications for payments, class reminders, results and membership expiry, sent at the right local time.
- **An admin panel for your staff.** Manage banners, pages, courses, lessons, teachers, students, orders, coupons, exams, forums, help desk and reports. Each staff member sees only what their role allows.
- **Protected content.** Paid lessons and PDFs open only for students who paid or hold an active membership, and links cannot be shared.

How the system fits together

Three groups of people use three apps. All three share one platform, so a payment confirmed once unlocks the course, appears in your order list and sends the receipt.

Your team works in one admin panel. Students and visitors never see each other's data, and staff see only what their role allows.

Built for speed, safety and growth

Fast

- Public pages open in under 2.5 seconds on a 4G phone.
- Lesson videos stream from a specialist provider, so they stay smooth when many students watch at once.

Secure

- Payments are verified on our server, never trusted from the browser.
- A student is never enrolled twice or left without access after paying.
- Every admin change is logged. Daily encrypted backups. Independent security test before launch.

Ready to grow

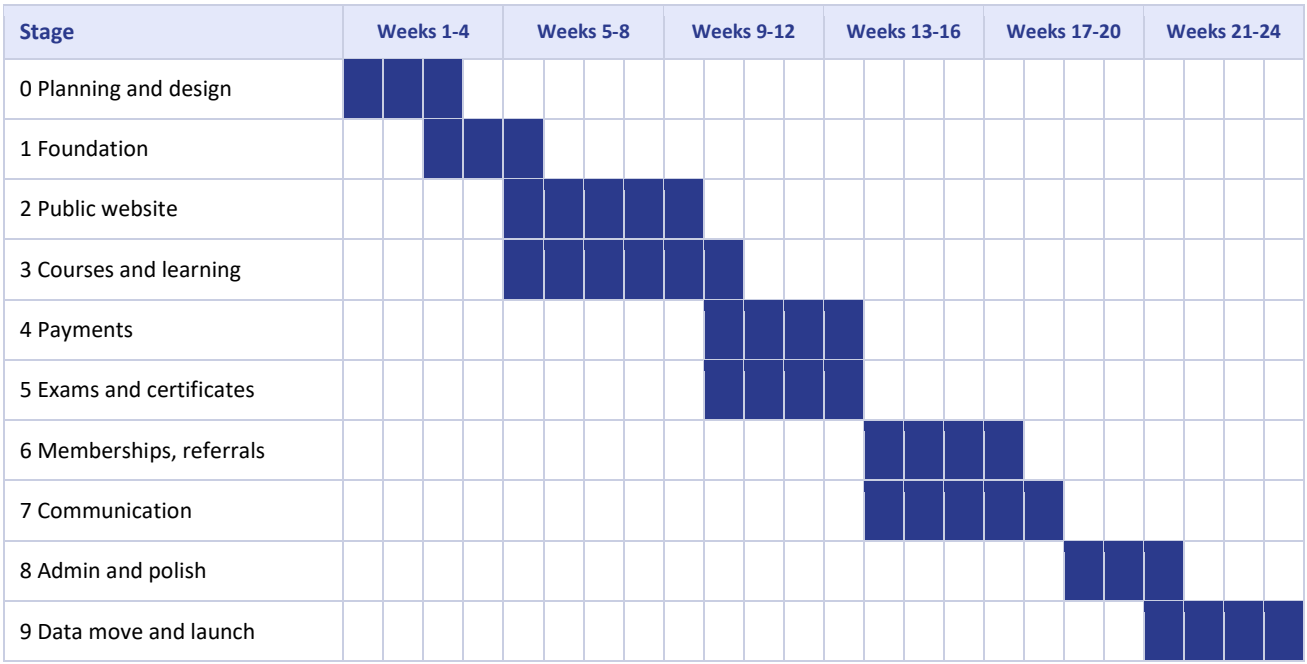

- Built on current, widely used technology, so any good developer can maintain it.
- New courses, languages and payment plans are added from the admin panel.
- Tested with thousands of students learning at the same time.

Delivery in ten stages

After every stage you see a working demo on a private test site, and we fix what you find before moving on. Testing time is included in each stage.

Stage	What you will see	Weeks
0. Planning and design	Approved screens for all three apps in IBMV branding. Final rules for memberships and access.	2.5
1. Foundation	Secure test site, staff logins and roles.	2.5
2. Public website	Complete website with courses, teachers, publications, contact and SEO. Admin pages to manage banners, menus and content.	4.5
3. Courses and learning	Students register, open lessons, watch videos, read PDFs and resume where they left off. Live class links.	5
4. Payments	Pay for a course with Razorpay, automatic access, receipts, coupons, refund tracking.	3.5
5. Exams and certificates	Timed exams, instant results, downloadable certificates with verification.	3.5
6. Memberships and referrals	Membership plans, renewals, referral links and credits.	3.5
7. Communication	Email, WhatsApp, SMS and push reminders, discussion forums, announcements, calendar and help desk.	5
8. Admin and polish	Dashboard, reports and exports, SEO tools, Hindi translations, accessibility review.	2.5
9. Data move and launch	Existing students and courses moved over, final security and load tests, staff training, go-live. Three months of bug-fix support follow launch.	3.5

Stages overlap, because two groups of developers work side by side. The timeline below shows the planned 24 weeks.

Planned launch at week 24. Plan for week 28 to allow for feedback rounds and approvals from WhatsApp, SMS and payment partners.

What we need from IBMV

These answers keep the schedule on track. We need them by the end of stage 0.

1. **Membership and access rules.** Which courses does each membership include, and what happens when it expires?
2. **Existing student data.** An export of current students, enrollments and progress from your present platform, and agreement on how students get their new login.
3. **Mobile app.** The new platform works as an installable web app on phones. A separate native Android and iOS app is possible as an extra project.
4. **Partner accounts.** Razorpay, video hosting, email, WhatsApp Business and SMS. WhatsApp message templates and SMS registration need approvals that take 1 to 2 weeks, so we start these in the first week.
5. **Certificates and exams.** Certificate design and eligibility rules, and whether exams need question types beyond multiple choice.
6. **Languages, invoices and donations.** Whether the whole interface should be in Hindi, whether student receipts must follow a tax invoice format, and whether the donation page is part of this project.
7. **One decision-maker.** A named IBMV contact who replies within 2 working days.

Quotation

Item	Details
Prepared for	IBMV Mahavidyalaya
Prepared by	Aparupa Gouranga Das
Date	16 October 2026
Total price	Rs. 5,00,000 (Five lakh rupees only), No GST is charged.

Included in this price

- Public website, student portal and admin panel as described in the ten delivery stages.
- Razorpay payment integration, exams and certificates, memberships and referrals, forums, announcements, calendar and help desk.
- Connection of the notification system to your email, WhatsApp, SMS and browser push providers.
- Moving existing students and courses to the new platform.
- Testing in every stage, final security and load tests, and staff training.
- **3 months of support after the launch date.** Any bug in the delivered features is fixed at no extra charge during this period.

Not included

- Hosting and server charges.
- WhatsApp and SMS charges, including message costs and provider fees. These are quoted separately in a separate PDF.
- Other third-party fees such as Razorpay transaction fees, domain, video hosting and email service subscriptions.
- New features or changes outside the agreed scope, and a native Android or iOS app. These are quoted separately.

Payment schedule

Milestone	Share	Amount
At project start	30%	Rs. 1,50,000
After stage 3, courses and learning	30%	Rs. 1,50,000
After stage 7, communication	30%	Rs. 1,50,000
At go-live	10%	Rs. 50,000
